

# RADIOLOGY REPORT

Patient: Helen Kowalski

MRN: MRN-10006

Date of Birth: 06/03/1944

Study Date: 04/12/2026

Ordering Provider: Dr. Priya Nair

Facility: Eastside Imaging Center

EXAMINATION: MRI Brain without contrast

CLINICAL INDICATION: Memory complaints, rule out vascular dementia.

## FINDINGS

Brain parenchyma: Mild diffuse cortical atrophy, age-appropriate.

White matter: Scattered periventricular T2/FLAIR hyperintensities, Fazekas grade 1, consistent with mild small vessel ischemic disease.

Ventricles: Mildly prominent, symmetric.

No acute infarct, hemorrhage, or mass effect identified.

## IMPRESSION

1. Mild small vessel ischemic disease.
2. Mild age-appropriate cortical atrophy.
3. No acute intracranial pathology.

Interpreting Radiologist: Dr. Yolanda Serrano, MD
